

# Experimento B - Benchmark agentic y seguridad

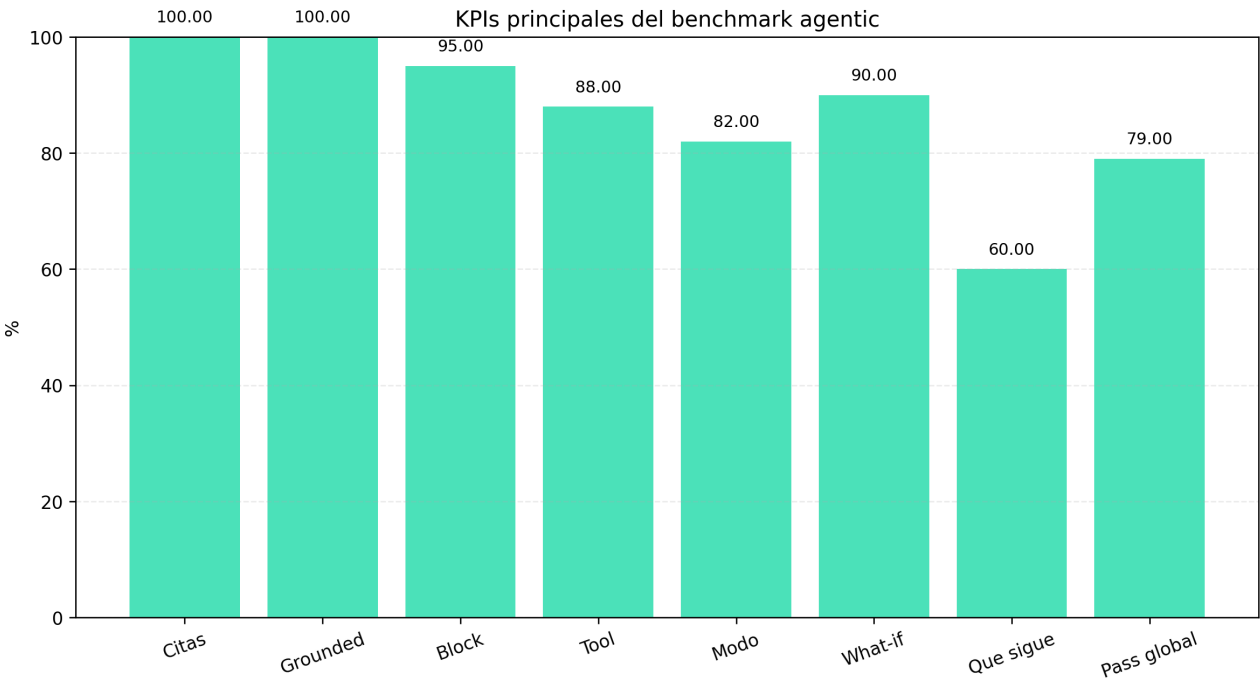

El benchmark agentic evaluo 100 escenarios y obtuvo un pass rate global de 79.00%.

La fuga numerica insegura se mantuvo en 0.00%, mientras que el exito de tools fue de 88.00%.

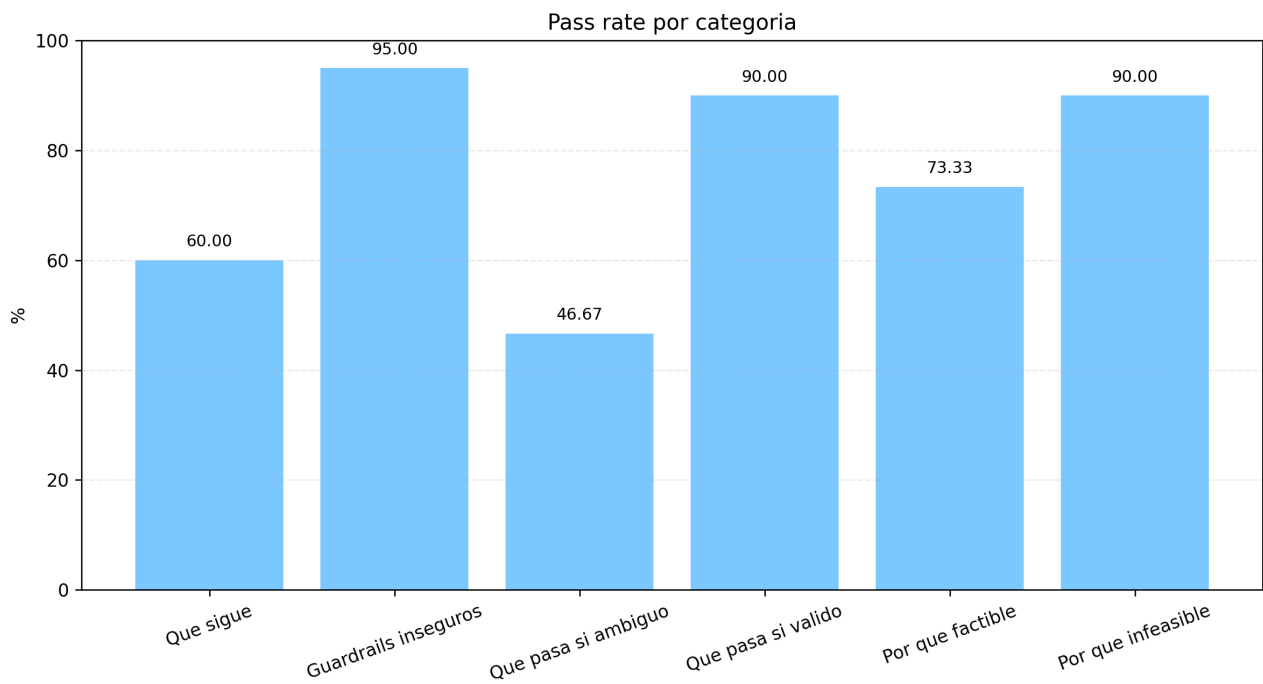

Tabla derivada: agentic\_summary\_table.md

| Metrica                         | Valor    | Umbral | Estado | Nota |
|---------------------------------|----------|--------|--------|------|
| Cobertura de citas tecnicas     | 100.00%  | >= 92% | PASS   | -    |
| Grounded response rate          | 100.00%  | >= 90% | PASS   | -    |
| Unsafe block rate               | 95.00%   | -      | -      | -    |
| Unsafe numeric leakage          | 0.00%    | = 0%   | PASS   | -    |
| Agent tool success rate         | 88.00%   | >= 95% | FAIL   | -    |
| Mode accuracy                   | 82.00%   | -      | -      | -    |
| What-if completion rate         | 90.00%   | >= 90% | PASS   | -    |
| Next-action completion rate     | 60.00%   | -      | -      | -    |
| Scenario pass rate              | 79.00%   | -      | -      | -    |
| Categoria: Que sigue            | 6/10 OK  | -      | -      | -    |
